Summary

Enthusiastic and self-motivated aspiring Web Developer actively learning and building skills in HTML, CSS, and JavaScript. Eager to grow expertise in front-end development, having successfully created interactive applications like a math app, Tic-Tac-Toe game, and a dice roller. Passionate about creating engaging user experiences and contributing to web projects.

Skills

- **Languages:** HTML5, CSS3, JavaScript (ES6+)
- **Version Control:** Git, GitHub
- **Concepts:** Responsive Design, DOM Manipulation, Event Handling, Basic Algorithms

Projects

Simple Math Application

- **Description:** Developed a web-based application that allows users to perform basic arithmetic operations (addition, subtraction, multiplication, division).
- **Key Features:** User-friendly interface, real-time calculation display, input validation.
- **Learnings:** Enhanced understanding of JavaScript functions, event listeners, and basic UI/UX principles.

Live Demo : <https://applicationofmath.netlify.app/>

Tic-Tac-Toe Game

- **Description:** Created a classic Tic-Tac-Toe game playable in the browser.
- **Key Features:** Interactive game board, win condition detection, turn management, reset functionality.
- **Learnings:** Practiced DOM manipulation for dynamic content updates, implemented game logic, and managed game state.

Live Demo : <https://utkarshastictactoe.netlify.app/>

Dice Roller Game

- **Description:** Built a simple web application that simulates rolling a six-sided dice.
- **Key Features:** Button to trigger dice roll, visual display of the rolled number, basic animations.
- **Learnings:** Applied random number generation in JavaScript, updated UI based on game events, and styled elements for visual appeal.

Education

Master's In Computer Application (July 2024)

Datta Meghe Institute Of Higher Education And Research, Wardha, Maharashtra

Experience

Seeking First Professional Opportunity

While I currently do not have formal professional experience in web development, I am actively seeking a challenging entry-level position where I can apply HTML, CSS and Javascript knowledge and grow as a developer. My dedication to continuous learning and strong problem solving skills make me a valuable prospective team member.

Interest

Web design, Front-End Frameworks, User Experience(UX), Open Source Contributions, Learning New Technologies
